

The little Charger illustrated above, is the latest addition to the line, and it makes the Miniature Duro-Pack N/C Battery System more attractive and more economical than ever. The new Charger combines lightweight, compact size and low cost, together with all the essentials for safe, sure battery charging. The Charger measures about 2"x2"x1½" and weighs barely 9 ounces. It operates from standard 120 volt, 60 Hz, AC outlets.

Cameramen everywhere are fascinated with the compactness and the "cordless" feature of the Miniature Duro-Pack Battery. Some were discouraged by the size and cost of the original multi-battery Automatic Charger. But now there is a choice:

1) THE NEW:

Catalog No. 331-054 Mini-Charger for Miniature Duro-Pack Batteries.
Charges a **single** battery @ 170-211 ma rate; Charging: 12 hours maximum, timed manually.

2) THE ORIGINAL:

Catalog No. 331-053 Auto Charger for Miniature Duro-Pack Batteries.
Charges up to 4 batteries simultaneously; with **built-in timer** for 200 ma charging rate and 40 ma floating rate; and 170-200 ma charge rate from 12V car or boat battery.

So now: there is all the carefree convenience of automatic timing and multi-battery charging of the Auto Charger for those who want it – and, there are the strict "basics" of the new Mini-Charger for those who demand strict utility and economy.

Catalog No.	Description	List Price
331-054	Charger for Miniature Duro-Pack Battery Operates from 120V, 60 Hz power lines. Charges single battery. Size: 2" x 2" x 1½"; Weight 9 ozs. Charging: 12 hours maximum, timed manually.	\$ 25.00
